Professional Summary

I am a front end developer with a passion for creating a more accessible and stylish Internet. As someone with an arts degree breaking into the tech industry, I have a lot to offer: namely my ability to creatively problem solve and collaborate well with others, and my unique perspective as a former art student. I love learning new technologies— that's the whole reason why I got into front-end development!

Skills

- HTML5, Bootstrap
- CSS3, Sass / SCSS, PostCSS / CSS Modules
- Javascript, Typescript
- Angular, React.js, Next.js
- Amazon Web Services, Netlify, Vercel, Wordpress CMS, Node.js
- Java, Spring, SQL, Object-Oriented Programming
- Adobe Photoshop, Adobe Illustrator, Figma

Professional Experience

Infosys Limited

January 2021 to Present

CANVAS Library

The CANVAS Library is an internal component library for various Verizon services. A large variety of components categorized by scope and usage are provided to the users via downloading a package. Documentation of the library is included within both versions as well as hosted on a remote location for offshore users.

Environment:

HTML, CSS, Javascript, Angular, React.js, Storybook, Git, JIRA

Revature

August 2020 to December 2020

Revature Swag Shop

Revature Swag Shop (RSS) is an application designed for development level users to collect points through a suite of applications aimed at the gamification of learning new technologies. One application of this suite is built into RSS, which facilitates the creation and consumption of

quizzes aimed at testing and enhancing knowledge of relevant technologies.

Environment:

Java, Spring, Hibernate, JPA, JUnit, Angular, HTML, CSS, Bootstrap, Amazon Web Services, Jenkins, DevOps, SQL, RDS

Astrological

Astrological is a platform that allows users to connect with others interested in zodiac and horoscope information. All users are able to view data about zodiac signs and user profiles, as well as update their own profile. Users can follow and unfollow other users.

Environment:

Java, Spring Framework, Spring MVC, Angular 4, PostgreSQL, Hibernate, Maven, Git, AWS RDS

Expense Reimbursement System - 200803

The Expense Reimbursement System (ERS) will manage the process of reimbursing employees for expenses incurred while on company time. All employees in the company can login and submit requests for reimbursement and view their past tickets and pending requests.

Environment:

Servlets, Java, JavaScript, HTML, CSS, JDBC, SQL, AJAX, Bootstrap, RDS, Tomcat, Git, Maven

Projects

SQL Validator

As an assignment, I was tasked with building a full stack application that validated SQL queries. I was in charge of designing the overall appearance and front end functionality of the application, which involved validating the SQL query on the frontend and, depending on the query, connecting to the Node.js backend, retrieving data, and displaying that data back to the user in a table.

Work History

Infosys Limited, Tampa, FL — Front End Developer

From January 2021 — Present

Revature, Reston, VA — Software Engineer

From August 2020 — December 2020

Education

Virginia Commonwealth University, Richmond, VA

Bachelor's Degree in Fine Arts for Communication Arts

Graduated in May 2020
